

NOT ALL SULPHUR BENTONITE MANUFACTURED PRODUCTS ARE THE SAME

From the leader in the industry for over 50 years, you want the most effective product, with the best research and development, customer service, quality, and agronomic and educational support teams.

TO GET THE BEST, YOU MUST DEMAND THE BEST

ASK FOR TIGER!

Fast-track this growing season's success with TIGER XP®.

Tiger-Sul Microsite-Enhanced Technology® creates a TIGER Zone that improves early-spring sulphate availability by releasing millions of sulphur particles from each TIGER fertilizer pastille. TIGER XP has a proprietary activator that accelerates sulphur-to-sulphate conversion as the soil warms and microbes become active, increasing the availability of macro and micronutrients. This provides better nitrogen use, less leaching loss, and improved phosphorus and micronutrient uptake.

For stronger, healthier crops that deliver higher yields and greater ROI, apply TIGER XP.

To learn more about Tiger-Sul's proven ROI benefits or to contact the sales and technical teams visit TigerSul.com and ASK FOR TIGER!
