SAFETY DATA SHEET  
TECHNO-Z (ZINC 15% + SULFUR 70%)

Section 1: CHEMICAL IDENTITY AND USE

Product Name: TECHNO-Z (ZINC 15% + SULFUR 70%)
Active ingredient: Sulfur & Zinc
Chemical Classification: Non Metallic & metallic element, as fertilizers
Chemical Name: Sulfur & Zinc
CAS No.: 7704-34-9 & 7440-66-6
Molecular weight: 32.1 & 65.39
Manufacturer:
Sulphur Mills Limited
604/605, 349 - Business Point
Western Express Highway
Andheri (E) - 400 069
Mumbai, India
Tel: +91 22 43452222
Fax: +91 22 43452245
Product use: Soil Fertilizer in microgranular form.

Section 2: HAZARD IDENTIFICATION

Health Hazards: Acute toxicity inhalation Cat. 4
Skin corrosion/Irritation Cat. 2
OSHA: Combustible dust

Signal Word:
WARNING

Hazard Statement: Causes skin irritation. Harmful if inhaled. May form combustible dust concentrations.

Precautionary Statements
Prevention:
Avoid breathing dusts or fumes. Wash thoroughly after handling. Use only outdoors or in a well ventilated area. Wear protective gloves. Observe good industrial hygiene practices.

Response:
• IF ON SKIN: Wash with plenty of water.
• IF INHALED: Remove person to fresh air and keep comfortable for breathing.
• IF SHIN IRRITATION OCCURS: Get medical attention. Take off contaminated clothing and wash before reuse. Call a POISON CONTROL CENTER or doctor if you feel unwell.

Section 3: COMPOSITION /INFORMATION ON INGREDIENTS

Section 4: FIRST AID MEASURES

If poisoning occurs, contact a doctor or Poisons Information Center.
• Eyes: Rinse eyes well with copious amount of water for at least 15 minutes.
• Skin: Remove any contaminated clothing, wash skin thoroughly with soap and water. Obtain medical attention if irritation occurs.
• Inhalation: Remove from source of contaminated to open space/fresh air, maintain respiration. Obtain medical attention if symptoms persist
• Ingestion: Rinse mouth with water and drink a glass of water. If vomiting occurs, drink further water. Seek medical attention.
• Antidote: No antidote, treat symptomatically.

Section 5: FIRE AND EXPLOSION HAZARD

Flash Point: 190 °C
Auto Ignition Temperature:
Dust Clouds - 190 °C (374 °F)
Undispersed Dust - 220 °C (428 °F)
Flammable Limits in Air:
Minimum explosion concentration is approximately 35gm per cu. metere (0.035 oz per cu. ft.) Maximum explosive concentration lies between 1000 and 2000 gm/m3 probably about 1400 gm/m3, (1.4 oz per cu. ft.)

Fire and Explosion Hazards:
Flammable solid. Dust suspended in air is readily ignited by flame, static electricity or friction spark. Every reasonable step must be taken to minimize dust formation. Handling equipment must be grounded or bonded to avoid static electricity. Keep away from sources of flame or sparks.

Fire Extinguishing Agents Recommended –
Fine water spray or fog, CO2 or dry chemical powder. Small fires may be smothered with sand or solid sulphur.

Fire Extinguishing Agents to Avoid –
Hoses and extinguishers with pressure streams should be avoided where solid sulphur is dusty or where it may create a further hazard by raising more dust clouds.

Special Fire Fighting Precautions –
Because burning sulphur evolves sulphur dioxide, breathing apparatus or gas masks approved for use in acid-gas atmosphere should be used. Fumes from unprotected sulphur fires shall be avoided if possible by approaching from the upwind side.

Section 6: ACCIDENTAL RELEASE MEASURES
Eliminate all potential sources of ignition. Cover with damp inert material such as sand and sweep or vacuum up without generating dust. Shovel into labelled, sealed containers, bags or drums for disposal or reuse using a spark-free shovel. Equip clean up personnel with appropriate protective equipment and work upwind or increase ventilation.

Section 7: HANDLING AND STORAGE PRECAUTION
✓ Store in original container in a cool, well-ventilated area away from sources of heat or ignition and out of direct sunlight. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations.
✓ Minimize dust generation and accumulation.
✓ Provide adequate precautions, such as electrical grounding or bonding or inert atmospheres.
✓ Keep containers tightly closed. Keep away from children.
✓ Keep away from food stuffs, seed, herbicides and insecticides.
✓ Wear protective equipment and clothing during use. Avoid skin and eye contact and inhalation of dust. Keep clothing as free from dust as possible.

Section 8: EXPOSURE CONTROL & PERSONAL PROTECTION

• Respiratory Protection:
  Dust-type respirators shall be provided for dusty conditions. Breathing apparatus must be available for emergency use in case of fire.

• Eyes and Face:
  Dust-tight goggles with plastic or rubber frames may be helpful in dusty conditions.

• Hands, Arms and Body:
  Workers whose skin may be sensitive to Sulphur dust should button collars, roll sleeves down, and gather trousers at the ankle. Gloves may be helpful.

• Other Clothing and Equipment:
  Hardhat and safety shoes. Fire-retardant fabric is recommended. Sulphur impregnated clothing should not be worn.

Eyes wash and washing facilities must be readily available. For decontamination of clothes and equipment’s have soap and water on hand.

Section 9: PHYSICAL AND CHEMICAL INFORMATION

Physical state: Solid
Appearance: Yellowish coloured free flowing granules
Odor: sulfur
pH: Not available
Flash point: 374.0°F (190.0°C) (Dust)
Granule size – 0.1 – 0.5 mm

Section 10: STABILITY AND REACTIVITY DATA
Stability: Product is stable under normal conditions
Conditions to Avoid: The main hazards are heat, spark and open flame and dust explosions
Hazardous Polymerization: Will not occur
Materials to Avoid: Mixtures with chlorates, nitrates or other oxidizing agents may be explosive.
Sulphur will react with alkalis or alkaline earths.
Hazardous decomposition: burning may produce toxic fumes, including oxides of Sulphur.
Section 11: TOXICITY INFORMATION

<table>
<thead>
<tr>
<th>Acute toxicity</th>
<th></th>

Section 12: ECOLOGICAL INFORMATION

Nontoxic to bees, fish and wild life.
Avoid contaminating waterways

Section 13: DISPOSAL CONSIDERATIONS

Local regulations should be adhered to. Incineration in controlled furnace. Destroy the empty containers in a safe and authorized place. If burnt avoid inhalation of smoke (if burning permitted). Never re-use empty packs.

Section 14: TRANSPORT INFORMATION

Type of product: Fertilizer
State of product: Solid (granules)
DOT: Not regulated as dangerous goods
IMDG – Not regulated
IATA – Not regulated

Section 15: REGULATORY INFORMATION

It is a soil fertilizer with 70% Sulphur and 15% Zinc as active content in the form of microgranules.

Safety phrases:
S1: Keep locked up;
S2: Keep out of the reach of children;
S13: Keep away from food, drink and animal foodstuffs;
S20/S21: When using, do not eat, drink or smoke;
S35: This material and its container must be disposed of in a safe way;
S36/37/39: Wear suitable protective clothing, gloves and eye/face protection;
S62: If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label.
US Federal Regulations: This product is a “Hazardous Chemical” as defined by the OSHA Hazard Communication Standard 29 CFR 1910.1200.

Section 16: OTHER INFORMATION

Refer to NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids, for safe handling.

DISCLAIMER:
Information contained in this material safety data sheet is believed to be reliable but no representation; guarantee or warranties of any kind are made as to its accuracy, suitability for a particular application or results to be obtained from them. It is up to the User/Distributor to ensure that the information contained in the material safety data sheet is relevant to the product manufactured/handled or sold by him as the case may be, Sulphur Mills Limited makes no warranties, expressed or implied, in respect of the adequacy of this document for any particular purpose.
